ADULT BASIC EDUCATION PROGRAM STATISTICS

Students and Staff Data

July 1, 1967 - June 30, 1968

HIGHLIGHTS

Approximately 455,700 students throughout the United States were enrolled during fiscal year 1968 in Adult Basic Education Programs sponsored under the Adult Education Act of 1966. This reflects an increase in enrollment of about 66,800 students, or 17 percent over the total for the preceding year.

New enrollees represented about 50 percent of the total enrollment during fiscal year 1968.

A total of 54,100 students was reported as having successfully completed the program through the advanced level (grades 7 and 8) of instruction. However, this number excludes those in six States that were not able to separate advanced completions from their total numbers. These completions represented approximately 12 percent of the total enrollment reported.

There were 2,792 State and local Adult Basic Education workshops conducted for teachers during the year. Approximately 24,000 of the 29,300 Adult Basic Education staff in the Nation received preservice and/or inservice training.

Approximately one-fourth of the 42,555 Adult Basic Education classes were held in other than public school buildings.

INTRODUCTION

The Adult Basic Education Program--established under the Adult Education Act of 1966 1/-- is administered by the U.S. Office of Education chiefly through grants to State educational agencies. All States and outlying areas of the United States participate in the program. The recipients in turn provide funds to local schools to pay teachers and administrators; cover the costs of facilities, equipment, and supplies; and recruit and provide instruction and counseling services for enrollees in the program through the 8th grade level.

1/ P.L. 89-750, Title III, Elementary and Secondary Education Amendments of 1966.

To qualify for the grants, the States and other areas provide 10-percent matching funds and develop their procedures for carrying out the program. As specified in section 302, the act offers:

> ....education for adults to enable them to overcome English language limitations, to improve their basic education in preparation for occupational training and more profitable employment, and to become more productive and responsible citizens ....

Since fiscal year 1966, [2/] the first full year of the program, participation has increased substantially, as follows:

	FY 1967	FY 1968	FY 1969 (est.)
Funds	$26,280,000	$30,590,000	$36,000,000
Enrollment	388,935	455,730	532,000

Teacher Training and Special Projects

Part of the Adult Basic Education Program are programs providing for teacher training and special experimental and demonstration projects designed to help the States develop and operate the basic program. These activities are authorized under section 309 of the Adult Education Act of 1966 and are administered by the Adult Education Branch of the Office of Education through direct grants to eligible applicants.

The Teacher Training Program, started in 1966, has consisted primarily of 2- to 4-week summer institutes for teachers, administrators, and other personnel in State and local programs. These are intensive and innovative training programs emphasizing creative experimentation with curriculum, educational technology, and effective management of the Adult Basic Education Programs. Colleges and universities, State and local educational agencies, and other appropriate public or private nonprofit organizations are eligible to receive these grants.

2/ For the States, ending at various times during the year cited; for the U.S. Government, ending June 30.

National Advisory Committee

To review the operation and effectiveness of the Adult Basic Education Program, the National Advisory Committee for Adult Basic Education also was established by the Adult Education Act of 1966. The Committee is concerned with how many in the target population are being reached, whether sufficient funds are available, and whether the program is actually designed and operated to serve the established objectives. In an annual report to the President, the Committee includes recommendations for improvement and realization of the far-reaching objectives of the Adult Basic Education Programs.

****

The data in this report were compiled from the Adult Basic Education Annual Program Reports filed by each State or other participating area with the Office of Education's Bureau of Adult, Vocational, and Library Programs. This material will form the appendix of a complete report by that Bureau on fiscal year 1968 operations. Tables 1-14 were prepared by the National Center for Educational Statistics, Adult and Vocational Surveys Branch; table 15 by the Bureau. Another report by the Bureau, covering program operations for fiscal years 1965-67, is being prepared for publication.

The two Bureau reports will use additional statistical and descriptive information from the Adult Basic Education Program reports submitted by the State educational agencies through USOE Regional Offices.
